The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 3. NOTE: The newly added limitation "after forming the bonding pad", forming a resin insulating film to cover edges of patterns of the bonding pad and the intermediate layer, "including an outer interface thereof" requires further consideration and search.

In response to Applicant's remarks, Kwon shows that the layer 108 is a multi-layered UBM structure [0023]. The Examiner takes the position that one of the lower layers of the multi-layered structure meets the limitation of the intermediate layer and the topmost layers meet the limitation of the bonding pad. Additionally, in the broadest interpretation of the claimed subject matter, simultaneous formation, or "patterning two structures at the same time" has not been claimed. The passivation film covers the edges of the bonding pad as well as the outer interface in Kwon. Chen teaches that it would be obvious to form the passivation film of resin. In any case, the newly added limitations require further consideration and search.
